

BACKGROUND

I am a new immigrant from Seattle, Washington, United States who moved to Israel alone at age 18. I volunteered in a year-long Israeli Scouts program, then served in the Israeli Defense Forces as a “Lone Soldier” through “Garin Tzabar”. Now, I am eager to expand my knowledge in software development as I learn and grow into deeper responsibilities. I am seeking an opportunity to take the next firm step in my career. I’m looking to join a team at a company with smart and motivated people to learn from and share experiences with.

EDUCATION

B.Sc. Computer Science - College of Management Academic Studies (COLMAN), Rishon LeZion 11/2025 – Present

“Combat Soldiers to Hi-Tech” FullStack Bootcamp – CYBERPRO AI, Ramat Gan 11/2022 – 03/2023

“Running Start” - Bellevue College, Bellevue, Washington, USA 09/2016 – 06/2017

High School - Lake Washington High School, Kirkland, Washington, USA 02/2015 – 06/2016

PROFESSIONAL EXPERIENCE

Matrix I.T., Herzliya, Israel — *Dynatrace (Associate-Level Certification) Product Consultant* 05/2023 – 09/2025

- Used Dynatrace to monitor applications, infrastructures, and services, identified errors and runtime anomalies to solve problems in a fast manner with intent to improve customer system executions.
- Emphasized data analysis to obtain important understandings and offered data-driven recommendations to prevent execution limits in customer systems.
- Managed alerts of crucial metrics to increase team response rate and quicken response time to live events.
- Documented workflows to problem-solving solutions and drove team-wide knowledge sharing.
- Oversaw and consistently worked in parallel to many customers like *The National Digital Agency*, *The National Tax Authority*, *Mizrahi Bank*, and provided supporting services for other customers throughout the country.

Israel Defense Forces, Israel — *Tank Commander, 7th Brigade (Hativa 7)* 11/2018 – 07/2021

- Completed extra training courses for operating several heavily armored vehicles.
- Managed maintenance and fuel supply of all tanks and heavily armored vehicles in the brigade, ensuring only fully operational ones were used.
- Managed professional certifications for all tank crew members and provided appropriate training materials.
- Using Microsoft Excel alone, found and reported over 4.5 million NIS debts to be refunded to the brigade.
- Served as a “Lone Soldier,” overcoming personal life obstacles that other soldiers did not need to worry about.

Israeli Scouts, Tel Aviv, Israel — *Voluntary Service* 08/2017 – 06/2018

- Volunteered with Israeli children in Hatikva neighborhood.
- Provided efficiency-driven workflows to manage the youth group “branch” and conduct games and lessons about values and principles of life.
- Tutored English and Math to students of all ages and led summer and winter camps with full field trips.

PROJECTS

TravelingForSports

Code is available upon request.

- Won 1st place in 44 Ventures 2-day hackathon using TypeScript and React.
- Redesigned the concept behind the “www.travelingforsports.com” blogging website and made it a fan-interactive platform.
- Provided Proof of Concept of fan-to-fan interactive features like activity heatmaps of photos and reviews, chatting opportunities to fans of similar teams, and meetup scheduling options.
- Maintained features to allow planning of vacations/traveling through affiliate links (POC).
- Added “League Standings” visualizations to allow for easy accessibility of user-oriented important data.

LinkedIn Data-Scraper

Code unavailable but can be explained in more detail upon request.

- Won 2nd place in CYBERPRO’s 25-hour hackathon using Python, JavaScript, and Node.JS.
- Scraped specifically targeted LinkedIn profiles based on parameters and saved specific publicly available data.
- Generated and verified thousands of possible emails of the user directly through Gmail and Outlook systems.
- Automated the output of relevant emails, reducing man-hours and dramatically increasing accuracy.

LANGUAGES AND TECHNOLOGIES

Programming

Extensive experience in:

- HTML, CSS, JavaScript, TypeScript, Python, Node-Red, JSON, Markdown, PowerShell, XML, YAML.

Previous experience in:

- React, C, Selenium, MongoDB, Node.js.

Actively learning:

- C++, Raspberry Pi, React Native, Express.js, Tailwind CSS.

Technologies and Tools

Extensive experience in:

- Dynatrace, Git, GitHub, Notepad++, Postman, Home Assistant.

Previous experience in:

- Homebrew, npm, Swagger, JSON Web Tokens (JWT), BCrypt, Codex, GeminiCLI.

Familiar with:

- Zsh, GitHub CoPilot, Jenkins.

Cloud, Deployment, and Infrastructure

- Microsoft Azure, Amazon Web Services (AWS), Google Cloud Platform (GCP), Docker, Kubernetes, SAP, Netlify, Render, Grafana, Firebase, MySQL, PostgreSQL.

Productivity and Office

- Microsoft Office: Outlook, Teams, Excel, PowerPoint, Word, OneDrive, OneNote.
- Google Online: Calendar, Gmail, Meets, Sheets, Slides, Docs, Drive.
- Adobe Illustrator, Adobe Photoshop, Slack, Zoom.

Operating Systems

High familiarity:

- Windows, Windows Phone OS, Android, iOS, macOS.

Some familiarity:

- Linux, Debian, Ubuntu.

Learning Platforms

- StackOverflow, LeetCode, Scratch, Codecademy, GeeksForGeeks, Khan Academy, Udemy, W3Schools, CodeWars, freeCodeCamp.

IDEs

- Visual Studio Code, Cursor, Visual Studio, Xcode, PyCharm.

Browsers

- Google Chrome, Microsoft Edge, Safari, Firefox, Arc.
